SSL

Secure your site with the same technology that Fortune 500 companies use...at a price that's tough to beat

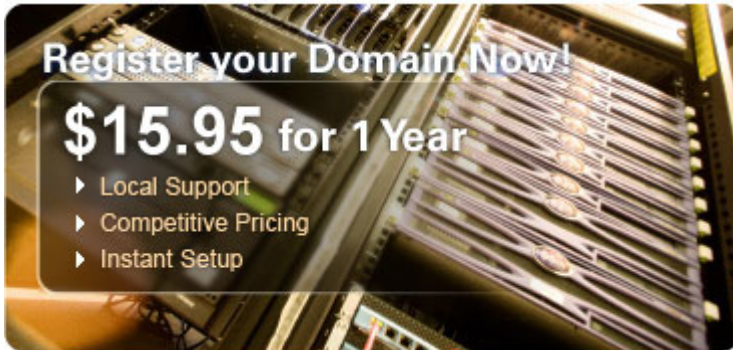

What is an SSL Certificate?

SSL Certificates are small data file that digitally bind a cryptographic key to an organization's details. When installed on a web server, it activates the padlock, https (over port 443) and allows secure connections from a web server to a browser. Typically SSL is used to secure credit card transactions, data

transfer, logins and more recently is becoming the norm when securing browsing of social media sites. An SSL Certificate binds together:

Your domain name, server name or hostname

Your organizational identity (i.e. company name) and location
