

Managed WiFi

Managed WiFi

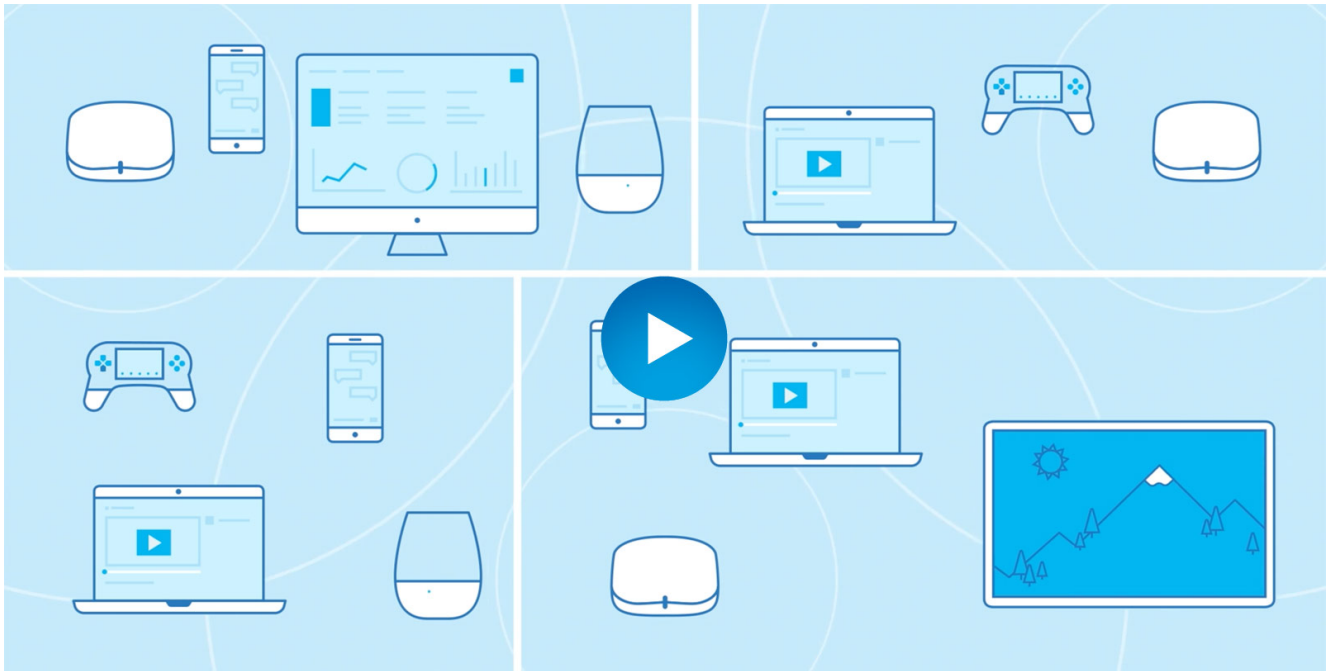

Seamlessly blanket your home or office with fast, reliable WiFi

Managed WiFi
NOW AVAILABLE!

Prep your home for greatness

You wouldn't expect a single light bulb to light every room of your home, you can't expect a single router to bring WiFi to every nook and cranny. Gorge Net's enhanced Whole Home WiFi – powered by eero – uses multiple access points and TrueMesh technology to make sure you can stream, work, and play from every corner of every room.

Customize or expand your WiFi by adding as many eeros as you need. You can cover a home of any size or shape.

Shape or size doesn't matter

No matter if it's an apartment, a townhome or a single family home, Gorge Net's enhanced Whole Home WiFi works no matter the shape or size. Customize or expand your WiFi by adding as many eeros as you need.

WiFi so good, it practically sets itself up

- With the eero app, you have complete control in the palm of your hand, not hidden in a black box.
- See your speeds and connected devices, and check their data usage – all in real time.

- Set schedules, create profiles for devices or just shut the whole thing down if you want to go off grid.
- Grant access to friends and family or share your WiFi with out-of-town guests or your babysitter.
- Get system updates, security patches and more automatically. Nothing you need to do!

Enhanced Security and Convenience

Normal routers require you to proactively check for and install security patches, eeros protect and secure the traffic flowing over your network automatically.
