

Happy New Year from Gorge Networks!

We are starting the new year off with new technology, new towers and new products. Thank you for your support in 2012! Our goal is to exceed your expectations in 2013. Let us know how we are doing or what we could do better by commenting [here](#).

Video and other things, getting better all the time!

Did you know that Gorge Networks is a member of the Seattle Internet Exchange? This membership allows us to exchange traffic directly with other network and content providers such as Netflix, Google, Amazon, and Facebook. This means we bi-pass complex network routes and deliver traffic directly to and from these partners, resulting in the fastest content delivery possible. For example, in our relationship with Netflix, Gorge Networks customers with qualifying speeds get access to FREE Super HD and 3D video streaming service that most major providers cannot offer; all because of our direct exchange in Seattle. This is just one of the ways our peering relationships get you first class treatment, and just

another reason it's fun doing business with Gorge Networks!

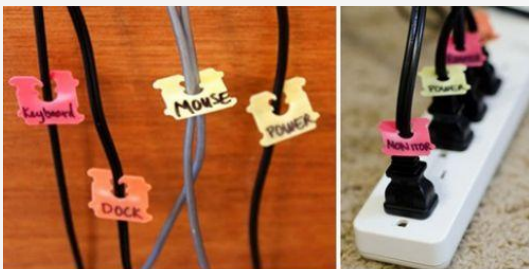

NEW Glenwood Wireless

Our soon to be completed wireless tower supports up to 3M Broadband and home phone service in Glenwood, WA. No phone line is needed to qualify for service.

Give us a call to get started (541) 386-8300 ext. 301, or [email us](#) and tell your friends to receive a \$25 refer-a-friend discount.

Tech Tip: Surge Protectors

Worried about power outages this winter? To avoid permanent damage to your modem/router and other network equipment we recommend a surge protector. Contact the [Sales](#) office if you would like to purchase one (prices start at at \$25.00). Gorge Networks is not responsible for damaged equipment during power outages.

Use bread bag clips to label cords.

Tech Tip: Surge Protectors Tech Tip #2 = BONUS!

We may be going a little Pinterest on you with this one, but we thought it was good enough to share, and might help those of you with *get organized* on your resolution list. Label your computer cords with used bread bag clips and never again wonder,

Where does that go?!
